YLWD Infrastructure Deemed Excellent After Earthquake

Yorba Linda, Calif. (July 29, 2008)- Immediately after the 11:42 am earthquake on Tuesday, July 29, 2008, the Yorba Linda Water District mobilized its Emergency Operations Center (EOC) to coordinate logistics and began systematically checking all reservoirs, booster stations and major pipelines for damage. Within two hours, YLWD infrastructure had been deemed safe, regional agencies had been contacted and the EOC had been de-mobilized, with employees returning to normal daily activities.
