MEDIA ADVISORY

DISTRICT CALLS FOR CONSERVATION DURING METROPOLITAN SHUTDOWN

The Metropolitan Water District of Southern California (MWD) has scheduled an eleven-day shutdown of the Allen-McColloch Pipeline (AMP), which is the large pipeline that supplies import water to Orange County. The shutdown is scheduled from Monday, January 13th through Thursday, January 23rd, to perform necessary maintenance and upgrades.

Yorba Linda Water District receives approximately 50% of our water supply from Metropolitan. In preparation, YLWD is filling reservoirs, and will rely on pumping more groundwater and conservation efforts to sustain service during this shutdown.

The District is asking customers to make an effort to curtail water use during this shutdown, turning off your sprinkler systems and refrain from scheduling any major landscaping work.
